SHAHZAD ALI

+92 311 8490931 Rahim Yar Khan, Pakistan
shahzadali.engineer@gmail.com LinkedIn GitHub

PROFILE

Full Stack AI Engineer skilled in Python, React, REST APIs, Machine Learning, and LLM applications. Experienced in developing web applications and AI-powered solutions, integrating APIs, and applying modern AI technologies to real-world problems. Strong foundation in software development, data science, and intelligent automation.

EDUCATION

Bachelor in Data Science 2022 – 2026
Khwaja Fareed University of Engineering and Information Technology, Rahim Yar Khan CGPA: 3.21 / 4.0

SKILLS

Programming Languages	Python
Frontend	React.js, HTML, CSS
Backend	Python, Node.js
APIs	REST APIs
AI/ML	Machine Learning, Deep Learning, LLM Applications
AI Automation	AI Agents, Workflow Automation
Databases and Cloud	PostgreSQL, Firebase, Supabase, Google Cloud, Vercel, Netlify
Tools	Git, GitHub, VS Code, Jupyter Notebook, Cursor, OpenAI Codex

EXPERIENCE

AI Intern Apr 2026 – Jun 2026
CodAgentic

- Contributed to the development of AI-based web applications using FastAPI, supporting reliable and efficient application performance.
- Collaborated closely with the development team to build, test, and refine software solutions, strengthening teamwork, communication, and problem-solving skills.

ML Intern Jun 2025 – Jul 2025
Arch Technologies, Islamabad, Pakistan

- Analyzed real-world data sets to extract actionable insights, supporting data-driven decisions for project stakeholders.
- Improved process accuracy and efficiency through iterative testing, quality checks, and performance evaluation.

PROJECTS

Multilingual AI Healthcare

- Developed a bilingual (English & Urdu) healthcare application for symptom analysis and medical assistance.
- Integrated AI-based lab report analysis and X-ray disease detection to support preliminary diagnosis.
- Built a mobile-friendly healthcare platform using Flutter with secure data handling and real-time services.

Medical Image Classification Study

- Designed and evaluated a classification model to categorize medical imaging data, improving review accuracy.
- Reduced manual processing effort through structured, metrics-based analysis.
